""Day 4 coding Statement: Write a program to identify if a number is positive or negative

Description

Get an input number from the user and check whether it is a positive or negative number.

""

```
value = int(input("Enter a Number: "))
```

```
if value>0:
```

```
    print("Positive number")
```

```
elif value<0:
```

```
    print("Negative number")
```

```
else:
```

```
    print("Neither positive nor negative")
```
